# RouletteRaid Software

contact us: [salesdesk@ezesoftware.co.uk](mailto:salesdesk@ezesoftware.co.uk)

Can you win an online roulette game? The answer for a long time has been not really, but here at RouletteRaid we have spent a lot of time and money redressing the balance. Our online roulette strategy resources have been released since early 2008 and the results so far have been amazing. Simple to use with outstanding results our products have become the talk of Roulette world. All our systems employ the use of our patented RAID and RAIDX fluid "learning" technology.

Our products are specifically designed for the online roulette game. The software is intended for use on the single zero live wheels. All our products are free to try. To purchase one of our products you have to download the free trial and obtain the activation code to fully activate the roulette system software.

We don't fill our correspondence with testimonials, that would be stupid. We simply say, search the web, read the forums, check the roulette chat, our customers sell our products for us.....

## 1. What is Rouletteraid?

Rouletteraid is roulette prediction software. The software calculates the most probable result and advises on a suitable stake. The software is simple to use. Start up RouletteRaid and sit it along side your online casino game. Just enter the result from your casino game into the RouletteRaid and follow Rouletteraid roulette prediction.

## 2. Purchasing

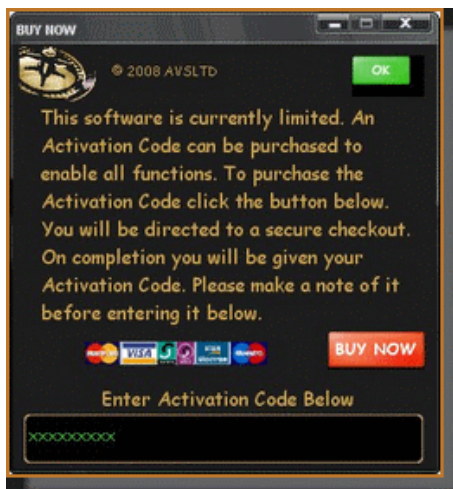

We do not allow customers to purchase our software without using our free demo first. This is to ensure that the product is suitable for our customers needs before any money is paid!

To make a purchase first download the software from our downloads page. Allow the software to automatically install on your computer. The software is free to try and can be removed with your MS Windows Control Panel or the uninstall facility installed with the software.

The software comes in DEMO MODE. This allows the user to "get a feel" for the software and decide if it is suitable. However, the predictions given in the demo mode are "NOT REAL PREDICTIONS".

If the software is suitable and you wish to make a purchase, simply use the software until the purchase window appears. When the Purchase window appears, you can click on the BUY NOW button. This will direct you to a secure checkout where you will be asked to pay for the product.

After payment you will be sent an activation code via email. Once this code is entered into your software, it will become fully enabled and produce "REAL PREDICTIONS!"

## 3. Getting started with Rouletteraid

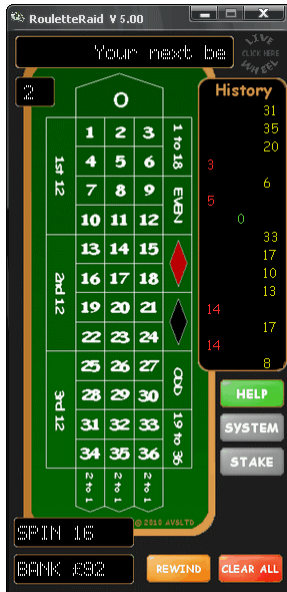

Start up RouletteRaid and sit it along side your online casino game. Ensure you can see both your casino window and you rouletteraid window. This will allow you to enter your casino game results in to rouletteraid without having to minimize your window.

## 4. Using RouletteRaid

RouletteRaid now has functions to make the use of it even easier. Your currency and bank will be set automatically at start up.

Click on the STAKE button to see the current minimum stake setting. The default is 1.00 but it can be increased to 10.00 by continued clicking of the STAKE button. Be aware that all the systems employ a progressive accumulation strategy so do not start with too bigger stake.

Click the SYSTEM button to see the current system selection. Continued clicking of the SYSTEM button will change the current selection. Your selection will be displayed for two seconds in the lower text window and will be retained in the memory for future sessions.

Now the scrolling text and flashing icons will show your bet. You must follow the bet exactly; any deviancies from the amount advised will make the system fail. Once you get your result, enter it in to RouletteRaid by clicking the number on the roulette table. Now the scrolling text and flashing icons will show your next bet. The bank will show your new balance and the spin count will increase.

## RouletteRaid System Overview

### 5. RouletteRaid Graphic Display

- HISTORY shows your previous results.

- FLASHING ICONS The flashing icons are a visual indication to your next bet. If your next bet is a single number it will appear on the top left of the roulette table.

contact us: [salesdesk@ezesoftware.co.uk](mailto:salesdesk@ezesoftware.co.uk)

## 6. Text Display

- SPINS Number of results entered or spins of wheel.
- BANK Bank balance adjusted by stake and winnings or losses.
- TOP TEXT displays your results, next bets and general guidance.

## 7. RouletteRaid Buttons

-  HELP Navigates the user to RouletteRaid help page.
-  SYSTEM allows the user to see and change the system to run!
-  STAKE allows the user to see and change the minimum stake to play with. From 1 to 10.
-  SAVE allows the user to save the current spin history and totals to a txt file.
-  REWIND allows the user to remove the last bet made.
-  CLEAR ALL allows the user to remove all the bets made.

## 8. RouletteRaid Bank Functions

- The bank will show the profit or loss from a starting point of zero.

## 9. RouletteRaid Systems

- SOLEX This system predicts a single number win only. Wins can be quite spaced apart but with high profit. Incorporates use of patented RAIDX learning technology.
- ROULAN This system predicts mostly short odds bets except in extreme circumstances when probability is high on a single number. Incorporates use of patented RAIDX learning technology.
- PROBZ this system predicts two short odds bets which cover most of the table. Wins come thick and fast but with smaller profits. Incorporates use of patented RAIDX learning technology.

contact us: [salesdesk@ezesoftware.co.uk](mailto:salesdesk@ezesoftware.co.uk)

- COVERZ This system predicts a combination of two short odds bets and a single number bet! Wins come thick and fast. Remember though we are playing for the single number win. Incorporates use of patented RAIDX learning technology.
- SYSTMX Similar to COVERZ but with a more aggressive approach. Again wins come thick and fast. Remember though we are playing for the single number win. Incorporates use of patented RAIDX learning technology.

## 10. Downloads

Listed below is the latest version of our software. Simply click on the download links below to install the software. All our software is suitable for Win95, Win98, WinME, WinNT 4.x, Windows2000, WinXP, Windows2003 and Windows Vista.

After clicking the download link above, allow the software to automatically install on your computer. The software is free to try and can be removed with your MS Windows Control Panel or the uninstall facility installed with the software.

The software comes in DEMO MODE. This allows the user to "get a feel" for the software and decide if it is suitable. However, the predictions given in the demo mode are "NOT REAL PREDICTIONS".

If the software is suitable and you wish to make a purchase, simply use the software until the purchase window appears. When the Purchase window appears, you can click on the BUY NOW button. This will direct you to a secure checkout where you will be asked to pay for the product.

After payment you will be sent an activation code via email. Once this code is entered into your software, it will become fully enabled and produce "REAL PREDICTIONS!"

## 11. Refund Policy

RouletteRaid software products are marketed with a functional evaluation/download version for potential users to "try before you buy".

The design of the software forces customers to evaluate the software prior to purchasing a software license. Therefore, it is assumed that when a user purchases the registered version from

# RouletteRaid Software

contact us: [salesdesk@ezesoftware.co.uk](mailto:salesdesk@ezesoftware.co.uk)

us, he/she is satisfied with the program's features and function. For this reason, RouletteRaid does not permit the return of or offer refunds for the following products:

- A product that is custom configured to your specifications, including personalized products.
- Opened software where the software media packaging seal or sticker is broken.
- Electronic software downloads
